

Change selected Dice side

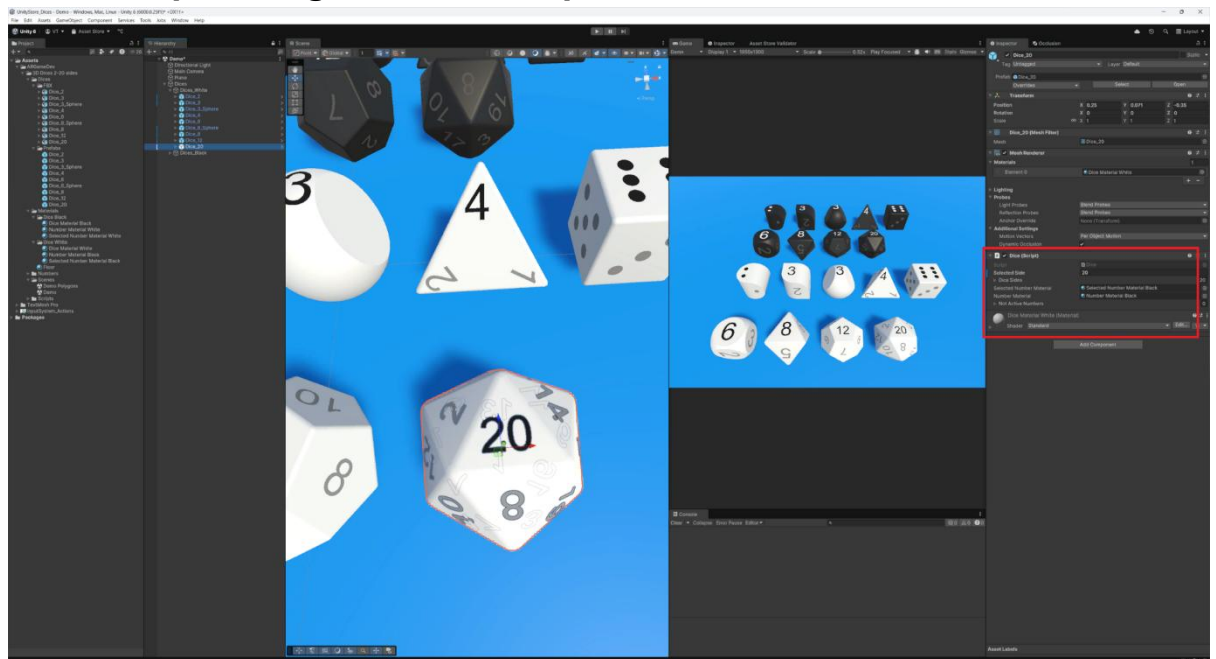

1. Make sure you are not in Play mode.

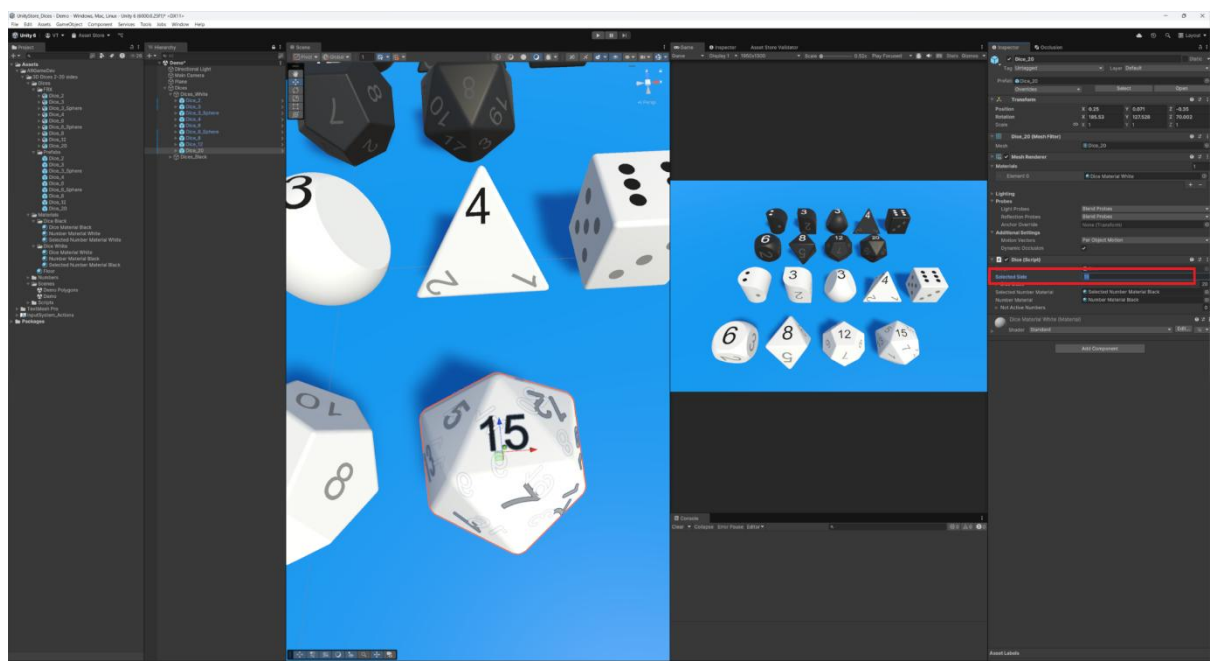

2. Select your Dice prefab in the Hierarchy window.

3. In the Inspector, go to the Dice panel.

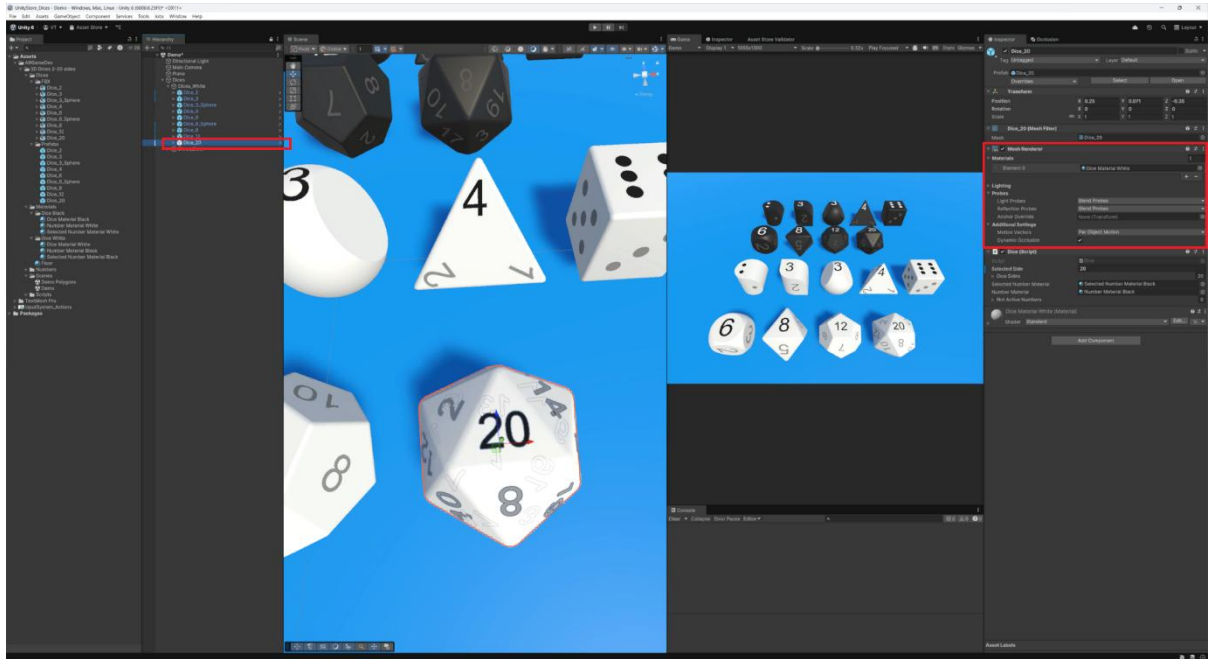

4. In Dice panel you can choose the side for the die. The selected side will be shown with the selected material, while the other sides will display different materials.

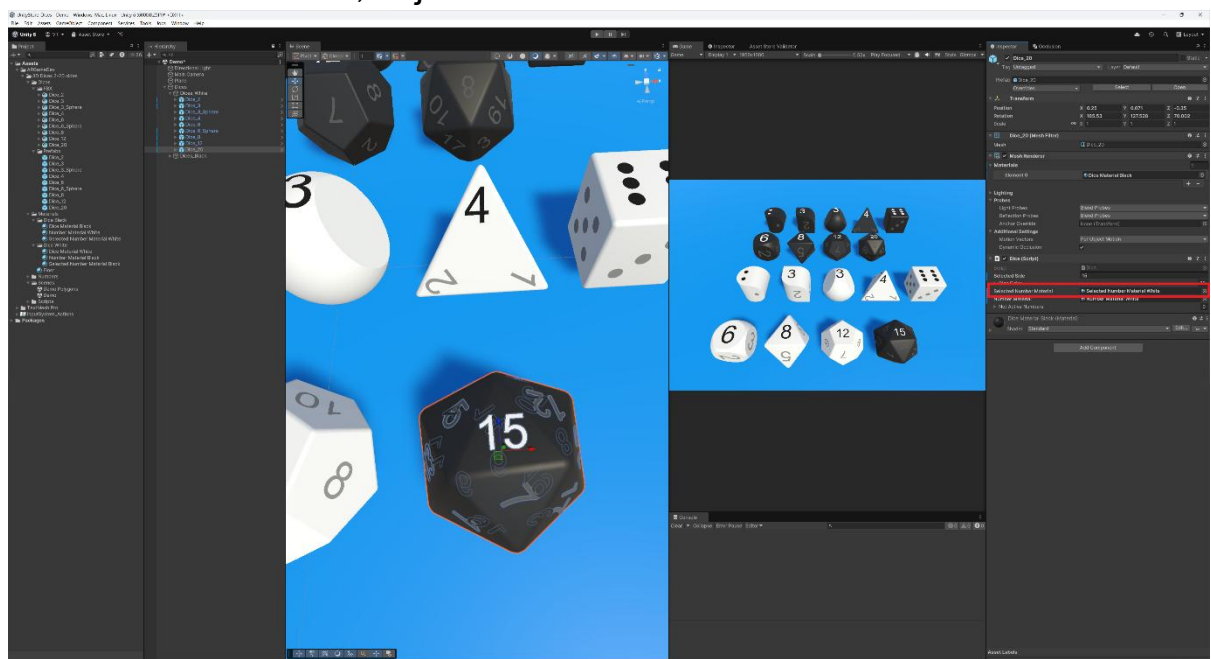

Change materials for sides and dice

- **To change the dice material:**
Select the dice, then update the material in the Mesh Renderer component.

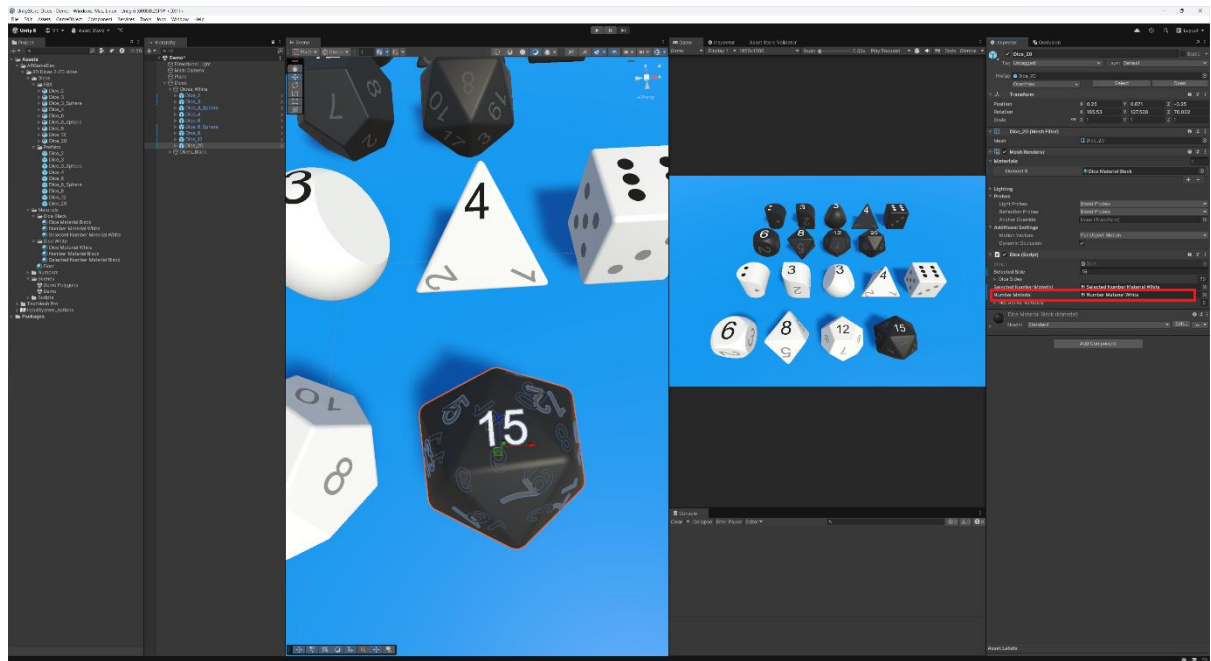

- **To change the material for a selected side or for the other sides:**
Use the Dice panel.

For the selected side, adjust the “Selected Number Material” variable.

- For the changing the sides material, adjust the “Number Material” variable.

Note:

When you change these materials in the Dice panel while not in Play mode, all materials will be automatically applied to every side of the dice.
